

FCC:

I benefit from listening to Satellite Radio. I drive many miles and enjoy the commercial free music. The weather and traffic channels are beneficial too because they are available when I need them. Not at half past the hour or whenever. Satellite Radio is great when our family travels out of town. We'll drive ten hours to the east coast and most of the time my three kids are listening to the variety of kids channels offered. Or we'll listen to something educational or even comedy. More than anything.....satellite radio is a choice. There are membership fees involved and I do not feel that it is up to the National Association of Broadcasters to dictate what I am permitted to hear.

Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I choose.

Thank you
Brad.
